DiKlor®-G

Gas sterilization for Mold Elimination

- ✓ Used for mission critical and on-going operating facilities
- ✓ Sterilizes the interiors of HVAC systems—which is unaffected by surface cleaning
- ✓ Only complete destruction technology approved by US EPA
- ✓ Awarded “Top 50 Technology” by the Defense Advance Research Project Agency (DARPA)
- ✓ Never had to re-treat a building in 15+ years
- ✓ Environmentally friendly & leaves no residual toxicity

Process of Sterilization

- Capable of all or part of a facility.
- Encapsulation concentrates the treatment and isolates from adjoining and neighboring structures.
- Timeline will vary depending on circumstances. But possible scenario would be:
 - 2-3 days staging equipment
 - 1-2 days encapsulation
 - 12 hours treatment
 - 12 hours takedown of encapsulation (re-occupation immediate)
 - 1-2 days equipment re-deployment

DiKlor® Applications

- Commercial Buildings
- Medical Facilities/Hospitals
- Food Processing Facilities
- Manufacturing Facilities
- Education Facilities
- Hospitality Buildings
- Ships and Vessels
- Retail Buildings
- Casinos
